SUMMARY

Combining skills in frontend development with a background in pharmacy and biotechnology, I strive to bring a unique blend of expertise in both technology and healthcare. Proficient in React and JavaScript frameworks such as Next.js, I have contributed to creating high-quality and dynamic web applications. I am currently enhancing my skills in UX/UI design fundamentals to further augment my development capabilities. Recognized for my meticulous attention to detail and effective communication skills, I am adept at translating complex concepts into user-friendly digital solutions.

PROJECTS

Unify - Team Project

[Code](#) | [Demo](#)

Summary:

Developed a dynamic & impactful charity website aiming towards helping disadvantaged communities using NextJs, tailwindCSS and firebase.

Description:

- Leadership: Led a team of 5 to successfully accomplish project objectives.
- UI design: Implemented UI libraries to create an appealing interface.
- Optimized Performance: Leveraged next.js with advanced rendering techniques ensuring optimal performance.
- Code quality Assurance: Employed Jest for snapshot testing, guaranteeing stability and reliability.
- Multilingual Support: Translated the website to four languages using i18next.

AmaZD - Team Project

[Code](#) | [Demo](#)

Summary:

Contributed in creating a clean and friendly e-commerce website.

Description:

- API Integration: Integrated a third party API to populate the website with realistic product data, enhancing the authenticity of the platform.
- User-Centric Design: Crafted a user-friendly interface using NextJs and tailwindCSS featuring product listings with filtering and pagination, and detailed product pages, prioritizing navigation and accessibility.
- Cart Functionality: Implemented a responsive cart feature enabling users to effortlessly add and remove items, with cart states efficiently stored in local storage for a persistent shopping experience.
- Collaborative Achievement: Showcased effective teamwork by contributing significantly to the project.

10 Melon - Team Project

[Code](#) | [Demo](#)

Summary:

Contributed actively in the development of a project that features advanced movie search functionalities, genre filtering, and pagination.

Description:

- API Integration: Integrated "themoviedb", a third party API to populate the website with realistic movie data, enhancing the authenticity of the website.
- Innovative Features: Showcased movie search capabilities, genre filtering options, and pagination techniques, highlighting a commitment to innovation in web application development.
- Collaborative Development: Played an integral role in a collaborative team effort to create and deliver the website within the assigned deadline, demonstrating effective teamwork and dedication to project success.

Madlibs - Team Project

[Code](#) | [Demo](#)

Description:

- Participated in creating a madlibs game based on implementing regular expression (Regex) and using vanilla CSS and JavaScript for minimal yet engaging user experience.

TECH STACK

Technical Skills

HTML	CSS	Javascript	React
NextJs	Git	Github workflow	
tailwindCSS			

Soft Skills

<u>Adaptability</u>	<u>Attention to detail</u>	
<u>Active Learning</u>	<u>Communication</u>	
Leadership	Problem Solving	Teamwork

KEY ACCOMPLISHMENTS

Leadership

Led a team of 5 to successfully accomplish project objectives.

API Integration

Integrated a third party API to populate the website with realistic product data.

Optimized customer recommendations model

That resulted in 22% revenue growth in regional stores.
